Who Does Your Printing?

All business houses need more or less printed matter, all of which is within the possibilities of the local printer. Yet how prone many are to pass up the home printer and let the orders go to city offices which have no interest whatever in rural communities except to get printing orders and the cash to pay for them. Business men, remember that the home paper is constantly promoting the interests of the home community and you owe it to yourself and your local paper to back up these efforts by at least having your printed matter done locally.

WHEN IN NEED OF PRINTED MATTER CONSULT

SCHMIDT-BERTSCH

A wedding of considerable interest among our southern neighbors was solemnized on Thursday last at the First German Baptist church, when Emma, eldest daughter of Mr. and Mrs. Christ. Bertsch became the bride of Mr. Theodore Schmidt. Rev. A. Ittermann, pastor of this church, tied the nuptial knot. Following the ceremony a reception was held at the home of C. G. Perman and a large number of merry makers were on hand to congratulate the happy young couple.

Mr. and Mrs. Schmidt will make their home on their farm near town.

"BEAU BRUMMELS" TO HOVE SEASON TOO!

The well-dressed man must now buy his Easter finery in the Fashion Week. He, like lady and the folks who buy new motor cars, is now told what particular week the newest styles and colour designs in masculine raiment will be shown.

In order to appear in the Easter parade correctly accoutred, he is advised by the furnishers to view their special display during "Men's Wear Week," which, this year, will be the week of April 14th to 20th.

It seems by mutual consent, the retailers of men's finery throughout Canada have established this week as their own in which to tog "Beau Brummel" so that he will hold his proper place among the bedecked fair sex on Easter Sunday.

NEW POLICY OF IMMIGRATION

The steps taken by the Dominion Government in inviting the provinces to assume a larger share of responsibility in immigration matters was laid before the House of Commons recently by Hon. Chas. Stewart, acting minister of immigration. He explained that his deputy was taking up the proposal with the individual provinces. The new plans were dependent on the house ratifying the agreements by which the provinces of the west get back their crown lands and other natural resources.

The statement of Mr. Stewart came during a debate on a resolution offered by T. E. Donnelly, Liberal, which, if carried will place the house on record as opposed to any assisted immigration "except insofar as financial assistance is at present being extended to female domestics."

"Under the proposed agreement with the provinces," Mr. Stewart declared, "we are asking them to assume the responsibility for saying how many and what kind of immigrants they are desirous of having and can absorb in any given year. We will not pass into Canada people destined to any province unless it is the desire of that province to receive them. It is not the intention of this government to prevent any individual in the British Isles, or in Northern Europe, who is in a position to finance his passage and who has a reasonable sum of money in his possession to maintain him self when he arrives in this country, from entering this country, unless the provinces should say that they are not desirous of receiving such immigrants. Under such circumstances we would have to debar to that extent an individual entering into that province."

Mr. Stewart continued, "We are not thinking of continuing any assistance except that we have not yet arrived at a definite decision as to whether we should discontinue assistance to juveniles. That is the only case in regard to which we have not yet reached a definite decision." The Dominion Government, he went on, intended to continue to lend its auspices by way of paying for the necessary number of officials to control immigration. "We must have officers at every port of entry into Canada," Mr. Stewart explained.

The minister could not conceive of any province "shutting the door" to immigration; but believed immigration would continue in accordance with the powers of absorption by the provinces.

LITTLE ITEMS OF LOCAL INTEREST

S. J. Garrett unloaded a car of the new Chevrolets this week.

Mr. and Mrs. Frank Smith and daughter returned Thursday from an extended visit with relatives in the Peace River country.

Anglican Church Services will be held in Christ's church, Carbon on Sunday afternoon at 3.00 p.m. The Rev. Attwood of Calgary will conduct the services.

Rev. and Mrs. C. B. Oakley of Elora were Carbon visitors this week.

Don't forget the C.G.I.T. Program on Friday night.

Mr. and Mrs. T. J. Ramsay, H. N. McNaughton and Ross Thorburn motored into Calgary on Thursday and returned Sunday morning.

Mrs. J. Hammel and daughter, Mrs. O. Kellar, left last Friday for San Francisco, where Mrs. Hammel will reside in future.

Mr. and Mrs. J. J. Greenan motored to Calgary on Monday of this week.

Mrs. W. Poxon was also a visitor to Calgary this week, going in on Tuesday.

Revival services are being held in the First German Baptist church this week. The Rev. A. Ittermann is conducting the services, which will be completed Friday night.

Next week these services will be continued at the Humboldt school.

The Farmers' Exchange store has commenced to operate under the Red and White Chain Store system and the store, both the exterior and the interior has been trimmed with these appropriate colors.

Rev. and Mrs. A. Ittermann motored into Calgary on Wednesday.

With the fine weather the past week the snow has all disappeared and the farmers throughout the district are busy getting their machinery in shape and their seed cleaned. If the weather holds out as it is now, it will not be long before we will see most of the farmers on the land; in fact a few of the more enthusiastic workers are now busy discing and harrowing.

STARTLING TULLY DRAMA SET IN UNUSUAL MELIEU

Jim Tully's realism, his humor, his drama, on the screen for the first time startled, thrilled, warmed and pleased large audiences who have seen his picture "Beggars of Life" which will be shown at the Carbon Theatre on Friday and Saturday of this week.

Never before has the saga of Hoboemia been told with such fidelity. Never before has the secret of the wanderlust been revealed with such certainty. Here is a fighting story; a story of men fighting an environment; a story of rough, cruel, lustful brutal men, of dreaming men.

Wallace Beery is back once again in the heavy, serious, dramatic roles in which he attained his greatest fame. As Oklahoma Red he is a smashing, domineering genius. His interpretation of this huge, vital, human animal of trampdom is something to marvel at, to captivate the imagination. Paramount has chosen well in placing Beery in the pivotal role in this great drama.

No less important to the story and no less successful in her interpretation is Louise Brooks, that slim, graceful girl who has won her way to moving picture fame by the sheer force of ability and personality. In "Beggars of Life" she plays a difficult role wonderfully well and climbs many rungs on her ladder to stardom.

Richard Arlen actually submerges himself in his part. His is the important juvenile role; his is the difficult business of translating the truer spirit of the wanderlust.

GOLF COURSE DRYING UP

With this fine weather the Carbon Golf Course is gradually drying up and it is expected that a number of the local enthusiasts will be on the course over the week end if the weather continues. The Golf Club have taken over the lease of the land that has been used as a golf course in former years and with this lease in hand it is expected that a most desirable golf course will be had this year.

MASONIC ENTERTAINMENT HELD HERE ON TUESDAY

Carbon Lodge No. 107, A.F. & A.M. entertained the officers and members of King George Lodge No. 59, Calgary, on Tuesday, March 25th. There were also present a number of Brethren from Acme Lodge No. 60; Rockyford Lodge No. 123; Rosebud Lodge No. 149; and their ladies. After Lodge meeting a social was held in the Farmers Exchange hall, which consisted of Bridge, Whist and dancing. During the evening a number of talented Brethren contributed to a short musical programme, which was greatly appreciated by all present. Many of the visitors expressed their opinion that the function was an outstanding event in all respects.

Mrs. R. Stone of Rockyford was the winner of the Bridge prize and the Whist prize was won by Mrs. S. N. Wright of Carbon.

POSSIBILITY OF DOMINION ELECTION IN JULY

Reports from Ottawa the past week seem to point to the possibility of a Dominion election either in June or July this year. Although Premier W. L. Mackenzie King has made no mention of this, it is said that the Government is secretly preparing for the onslaught and that it will come this year instead of next. It is said that Premier King fears the rising tide of Conservatism in the west and is anxious to have the Federal election over while his party is still the favorite among the people. If an election is to be held in June the present Government will have to "Go to the Country" within the next two weeks, as the Act states that proclamations must be issued 60 days before the day of election.

She— If you men would just stop looking at us girls in short skirts we'd soon stop wearing them.

He—Heaven forbid that you should go that far.

SOME LONG WORDS

What is the longest word in the English language? That is a hard question to answer, as writers have from time to time coined words of extraordinary length which have never gotten into general use.

The longest in Webster's International dictionary is honorificabilitudinitatibus, defined as "honorableness," a pedantic nonsense word used by Shakespeare in "Love's Labor Lost," and continuing 27 letters.

But in chemical treatises may be found even longer words more wonderfully compounded than the chemical products which they describe. For example, tetrahydroparamethoxyquinoline, with 31 letters; also paraoxymetamethoxyallylbenzene of 39 letters, and others.

English must yield the palm to some foreign languages, however, when long words are considered. In German, schutzengrabenvernichtungsausruestung with 35 letters, is as formidable as the war engine it describes. In English this machine is commonly designated by the four letter word "tank," a saving of 31 letters, going to the credit of our mother tongue.

Longest of all so far discovered is a Greek word of 181 letters, which appropriately enough is the name of a dish containing many ingredients. We call it simply "hash."

Out of consideration for the linotype operator we do not spell out the Greek word here. We have already given him enough worry for one day.

Children Cry for it

Children hate to take medicine as a rule, but every child loves the taste of Castoria. And this pure vegetable preparation is just as good as it tastes; just as bland and harmless as the recipe reads. (The wrapper tells you just what Castoria contains.)

When Baby's cry warns of colic, a few drops of Castoria has him soothed, asleep again in a jiffy. Nothing is more valuable in diarrhea. When coated tongue or bad breath tell of constipation, invoke its gentle aid to cleanse and regulate a child's bowels. In colds or children's diseases, use it to keep the system from clogging. Your doctor will tell you Castoria

deserves a place in the family medicine cabinet until your child is grown. He knows it is safe for the tiniest baby; effective for a boy in his teens. With this special children's remedy handy, you need never risk giving a boy or girl medicine meant for grown-ups.

Castoria is sold in every drug store; the genuine always bears Chas. H. Fletcher's signature.

What Do You Get Out Of Life?

Among the many publications which come regularly to the writer's desk is a little monthly magazine called "The Valve World," published as the house organ of a great manufacturing company having offices, branches, warehouses and factories all over the world, including every Canadian Province, except Prince Edward Island. One of the regular departments in this magazine is headed "From an Old Fogey's Inglenook," and consists of informal, personal chats of a most interesting, informative, and inspirational character. They are thought-provoking, while at the same time bringing comfort to the reader. They are a spur to one's ambition, a ray of sunshine on a gloomy day, an incentive to be up and doing, and to endeavor to find and appreciate true values in life.

Thoroughly enjoying "Old Fogey" as we do, we are this week passing on through the medium of this column one of the "gems" appearing in a recent issue. We quote it in full as it appeared under the heading, "One Recipe For Happiness."

A short story I was reading recently pictured a woman who had just lost her husband through an accident. One of her condoling friends said: "How sad he had to go so soon." To which the widow replied: "I am thankful for having had him so long."

I can see in this one recipe for happiness; one way toward the possession of a tranquil and grateful soul. Instead of letting sadness over the bereavement oppress her, because it had come so soon, she was thankful because it had been delayed so long. She could find that life had been better to her than it might have been, and that gratefulness for this was much better than sadness over the reflection that it might have given her more.

Life brings us much or little, largely as we take it. We get much or little out of life chiefly through our point of view as to what is much and what is little. It may seem little to us that we awakened this morning ready for another day of activity, or it may seem much that another day with its possibilities is before us. It is quite within ourselves to say "Another day in which anything may happen; another day of opportunity; another day to be alive and useful and helpful, and to do a bit more climbing; another day to grow in gentleness, to add to knowledge, to spread cheerfulness, to develop character, to stretch out the helping hand, to hold up the valiant head, to lengthen the forward stride. Another day to hope and to love and to add to our store of happiness."

It's all in the point of view. How infinitely better it is to be thankful that life has been given us and is giving us so much, than to be sad because we cannot have more. To say: "Good night, friend, I am glad to have had you so long," rather than: "I am sorry you have to go so soon."

It was the writer's first intention to offer some comment of his own on the above, but we refrain. It is complete in itself. We, therefore, merely say to you: Read it again; clip it out for future reading on some day when you are inclined to feel that life is hard, or monotonous, and unsatisfying, and yielding you so little. Remember it is chiefly your own point of view of what is much and what is little. You can make it much if you will.

If the world is a stage, the majority of people are merely scene-shifters.

Perfect dyeing so easily done!

DIAMOND DYES contain the highest quality anilines money can buy! That's why they give such true, bright, new colors to dresses, drapes, lingerie.

The anilines in Diamond Dyes make them so easy to use. No spotting or streaking. Just clear, even colors, that hold through wear and washing.

Diamond Dyes never give things that re-dyed look. They are just 15c at all drug stores. When perfect dyeing costs no more—is so easy—why experiment with makeshifts?

Britain's Playgrounds

Many Of World's Largest Parks Are Within the Empire

Within the confines of the British Empire are some of the biggest playgrounds in the world. Canada heads the list with no fewer than eight national parks, embracing an area of over 12,000 square miles, mostly situated in the Rocky Mountains amongst scenes of grandeur and beauty unsurpassed anywhere in the world. Jasper Park, in Northern Alberta, with an area of 4,517 square miles—two-thirds as big as Wales—is the largest of them. National playgrounds on a grand scale also constitute a feature in New Zealand. The two largest are the Tongariro National Park in the middle of the North Island, and the Fiordland National Park in the South Island. Fiordland Park, besides being one of the two biggest in the world, incloses within its borders sounds, lakes, rivers, waterfalls, and mountain scenery of remarkable beauty and grandeur. One outstanding feature is "The World's Wonder Walk," winding through a series of stupendous canyons and majestic gorges from Lake Te Anau to Milford Sound.

WAS WEAK AND PALE

Health Restored Through the Use Of Dr. Williams' Pink Pills

Mrs. Leo. Bedard, Quebec City, tells how her health and strength were restored through the use of that great blood-building tonic, Dr. Williams' Pink Pills. Mrs. Bedard says: "Some three years ago, after the birth of my little boy, I was left very weak and pale. I did not seem to have any strength, and at times I was so dizzy I would nearly fall down. A friend advised me to try Dr. Williams' Pink Pills and I did so. In a few weeks I was surprised to notice the difference in my condition—I felt like a new woman. I continued taking the pills until I had used ten boxes, by which time I had completely regained my former health and strength. I feel that I cannot praise too highly Dr. Williams' Pink Pills for what they have done for me."

To the woman in the home—the woman closely confined through household duties—Dr. Williams' Pink Pills are a positive blessing. So if you are suffering from any condition due to poor, watery blood, or weak nerves, begin taking Dr. Williams' Pink Pills now, and note how quickly your health will improve and your strength return. The pills are sold by all medicine dealers, or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Saskatoon Civic Utilities

The water works department at Saskatoon shows a net surplus for the year 1929 of \$31,717.59, as compared with \$18,561.54 for 1928. The revenue for the year was \$214,241.16.

Excellent For Croupy Children.—When a child is suffering with croup it is a good plan to use Dr. Thomas' Electric Oil. It reduces the inflammation and loosens the phlegm giving speedy relief to the little sufferer. It is equally reliable for sore throat and chest, carache, rheumatic pains, cuts, bruises and sprains. Dr. Thomas' Electric Oil is regarded by many thousands as an indispensable of the family medicine chest.

Importance Of Fish Industry

Fish caught off the coasts of Canada in the Atlantic and Pacific oceans in 1929 totalled 1,024,221,000 pounds, valued at \$26,170,350.

Persian Balm—the unrivalled toilet requisite. Essential to every dainty woman. Imparts rare charm and beauty to the complexion. Softens and beautifies the skin. Makes hands flawlessly white. Cools and refreshes. Relieves roughness. Ideal for true feminine distinction. Delicately fragrant. Swiftly absorbed into the tissues, leaving no stickiness. Persian Balm invariably creates a subtle elegance and charm.

He—"I say just what I think."
She—"Oh, don't be silent all evening."

Massaging the aching parts with **Minard's** brings comforting relief. Try it.

MINARD'S
"KING OF PAIN"
LINIMENT

Requires Master Craftsmen

Mosaic Workers In Rome Are Skilled In Art

The Vatican mosaic works, one of the most unusual manufacturing plants in the world, are ready to consign to the Roman Catholic University, at Washington, D.C., their latest production, a copy of Murillo's "Immaculate Conception," valued at \$25,000.

Few tourists making the rounds of the Vatican galleries and St. Peter's, know of the existence of the mosaic. Yet, the shop is one of the oldest in Rome, and one of the best known in the art groups of Europe.

A visit to the plant is an education. Here one sees master craftsmen whose skill has been passed on to them through generations of fathers and grandfathers who were artists in mosaic before them. They are men of infinite patience, in addition to their skill, for a mosaic may take from two to ten years to complete.

A few statistics help to explain the reason. When the visitor is told that there are actually 27,000 different colors or shades of color from which the mosaicists must choose, and also when he is told that thousands of small pieces of material, first heated to an intense degree, are later inserted one by one into special form, each one being chosen meticulously for its shade of color, he will begin to understand why. One mosaic has been known to require twenty years for completion.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

British Antarctic Expedition

Undertaking On Ambitious Scale Is Being Planned

A new British Antarctic expedition, the London Daily Herald says, is being organized under the leadership of Commander Frank Worley, who was skipper of the "Endurance" in Shackleton's South Pole expedition.

The paper said the expedition was to be on an ambitious scale and might include aeroplanes. It will cost in the neighborhood of £25,000 (\$125,000) and will be both commercial and scientific in purpose.

Minard's Kills Dandruff.

Canadian Forest Products

The manufacture of silk of a quality in many respects superior to the product of the silkworm from Canadian spruce wood; linoleum, dynamite and gramophone records from a flour made of wood; newsprint paper in a continuous sheet over twenty-two feet wide at the rate of over half an acre a minute from a single machine. — Handbook of Canada.

Sore throats need this Double-Treatment

RUBBED ON the throat, Vicks relieves in two direct ways:

(1) Its vapors, released by the body heat, are inhaled direct to the air passages; and

Record For Panama Canal

Tolls Amounting To \$86,665 Were Collected In One Day

A new high record for the amount of tolls collected from traffic through the Panama Canal in one direction in one day was established on January 18, 1930, when \$86,665 was collected from fourteen ships transiting from the Pacific to the Atlantic. The list of vessels was headed by the steamer Virginia of Panama-Pacific Line, on which tolls amounting to \$15,210 were assessed. The average amount collected was \$6,190.35.

The previous high record for tolls collected on canal traffic in one direction was established on December 8, 1928, when \$86,224.78 was collected from twenty-two ships transiting from the Atlantic to the Pacific.

British Not So Slow

There is nothing slow about the British railways, as is evidenced by the cabled news that the Southern road has secured stock in and made arrangements with the Imperial Airways by which an air service may be maintained, which will avoid "wasteful and unnecessary competition between the two companies in air transportation."

SPRINGTIME

Already there are many signs of
approaching spring. The gophers are
out and the blue birds are back after
spending the winter in their southern
abode. Spring is the season of rein-
carnation, rejuvenation and radiant
life. It is only to man that January 1
represents the birth of a new year
and the calendar year is an artificial
structure. With plant life and that of
the lower animals the coming of the
spring is at once the birth of a new
year and new life.

Humanity recognizes and speaks
of a new year as from January 1, but
nevertheless it observes it from the
first breath of spring. After the de-
parture of the drear and stifling win-
ter and with the coming of refreshing
and magnetic spring there is new life
and new hope created in the breasts
of men and women. Spring brings

great plans and high resolves which
only winter can demolish or deter.

It is not sufficient to say that the
homing instinct is convenient in the
spring. It is natural and not to be
gainsaid by man or beast. Spring ur-
ges the bird to build its nest, the ani-
mal to burrow into its mother earth
and man to plan his home, but neither
bird, beast nor man knows nor asks
why. Spring is the one and only ir-
resistible force.

LATE FOR SCHOOL

There does not seem to be a strict
enough rule in our schools for schol-
ars being late for classes. The school
hours in Carbon are from 9 a.m. to
12 a.m. and from 1.30 p.m. to 4 p.m.
On numerous occasions we see stud-
ents wandering to school after classes
have been called. And not only once,
but these same students will be seen
time after time. They must be late
for their classes. School starts on
time. We believe that if a more strict
rule were made regarding anyone
coming late that a great deal of this
tardiness could be eliminated. The
students do not seem to care if they
are late for school. It doesn't seem to
make any difference to them. Parents
are paying for the children to get an
education and they go to school for
that one purpose. They should be there
every day and be there on time. There
may be some provision made for the
children from the country attending
school in town, but as a rule these
children are on time. The town stu-
dents are the ones to check up on;
they are the worst offenders.

MY HOME TOWN FIRST

A creed for the home-loving citizen:
I buy at home—because my interests
are there; because the community
that is good enough for me to live in
is good enough for me to buy in; be-
cause I believe in transacting business
with my friends; because I want to
get what I buy when I pay for it; be-
cause I want to see the goods; because
every dollar I spend at home works
for the community in which I live;

because the man I buy from stands
back of the goods; because I sell what
I produce here at home; because here
I live and here I buy; because the
man I buy from pays his part of the
town, provincial and Dominion taxes;
because when ill luck, misfortune, ber-
eavement comes, the man I buy from
is here with his kindly greeting, his
words of cheer and his pocket book,
if need be.

THE VERSATILE MONTH

All of the evidence considered, it is
agreed that the month of March is
the dissenting member, the erratic re-
volutionary, the most fickle of the
fickle and the most irresponsible of
the undependable among the 12 major
divisions of the calendar year. It is
born of both winter and spring by
virtue of the calendar and weather
tradition. It is nature's, sample case.
There are weather reasons for the ex-
istence of the "crazy March hare" and
the prophetic association of March
with the lion and the lamb.

Throughout the major portion of
Canada the month of March is wel-
comed because it marks the death of
winter and the birth of spring. Among
the time-honored days of the year none
is quite so well met and joyfully re-
ceived as March 21, the first day of
spring. Sometimes the first day of
spring does not live up to its calendar
designation and harsh winds or dead-
ening snows strive for supremacy
over the urge of spring, but to no avail.

In closing March abdicates in favor
of April with her moving day, show-
ers and garden making.

JACK DEMPSEY TO TRY A COME-BACK

Jack Dempsey, former world's heavy
weight champion, is planning to re-
turn to the ring, and has notified his
representative in Los Angeles to pre-
pare a training camp for him. The
camp will be established at Ensenada,
Mexico, and will be ready for the ex-
change by May 1, the date he indicat-
ed in his telegram he will be ready
to start conditioning.

You can depend on advertised products

Advertising is the most powerful searchlight known to business.
It focuses the attention of a community or a continent on a par-
ticular product. It gives that product the advantages of a widespread
test by the buying public. But it cannot persuade that public to
buy any article it has tested and found wanting. Manufacturers and
merchants know this. They know also that advertising an unworthy
product does only one thing: It brings magnified attention to its
deficiencies. Therefore, before they undertake extensive or consist-
ent advertising, they make sure that their product is right.

Consistent advertising is your best assurance of value and
worth. It is fair evidence that the advertising is offering a good
product which has been thoroughly tested and approved.

THE ADVERTISEMENTS IN THIS NEWSPAPER HAVE BEEN
PASSED BY THE HIGHEST AUTHORITY—
THE BUYING PUBLIC.

WORLD HAPPENINGS BRIEFLY TOLD

The newspaper Excelsior, one of Mexico City's leading dailies, has announced it will practically eliminate crime news from its columns.

Rt. Hon. Tom Shaw, secretary of state for war, told a questioner in the House of Commons that no British officer was shot for cowardice during the Great War.

President Hoover worked for the state of Arkansas, on a mineral survey, in 1893, at a monthly salary of \$40, records of the state geologist department show.

At a meeting in Toronto, of Ontario members of the Canadian Press, proposals of the management for improving the character and volume of the service, particularly along the lines of a more intensive Canadian domestic coverage, were unanimously approved.

A SIMPLE TREATMENT FOR CHILDREN'S COLDS

Cold in the head is very common at this time of the year, especially in the very young. Neglect of a cold is prone to lead to serious consequences. To relieve all congestion of the system is the first step in treating a cold, whether in infants or adults. For the very young, Baby's Own Tablets are the ideal means of doing this. Containing no narcotics or other harmful drugs they soothe the child's fretfulness, relieve its suffering and ensure convalescence.

Baby's Own Tablets are without an equal for relieving indigestion, constipation and colic. They check diarrhoea; break up colds and simple fevers; promote health-giving sleep and make the dreaded teething period easy. The Tablets are the one medicine that a mother can give her little ones with perfect safety as they are guaranteed to be free from injurious drugs. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

She: "I heard someone yell 'fowl'; where are the feathers?"
He: "Oh, this game is between two picked teams."

One-fifth of the imports into New Zealand are from the United States.

USES PINKHAM MEDICINES

Praises Vegetable Compound, Blood Medicine and Liver Pills

Birchtown, Quebec—"I live 13 miles from town on a farm, with all my home duties and churning to attend to. At the Change of Life, I became nervous and run-down. The Vegetable Compound helped my whole system. My nerves are better, my appetite is good and I am able to do my work. I have also taken the Blood Medicine and the Liver Pills and they helped me. I will answer letters from women asking about your medicines."—Mrs. RICHARD CHARLTON, Birchtown, Quebec.

Blood Medicine and the Liver Pills and they helped me. I will answer letters from women asking about your medicines."—Mrs. RICHARD CHARLTON, Birchtown, Quebec.

W. N. U. 1830

Unknown History Makers

Hundreds Whose Words Live, Have Always Been Nameless

There are hundreds of people whose names we do not know, though their words have passed into history.

There is the nameless, well-dressed woman, who, meeting Wordsworth walking by Loch Kathrine one fine evening, observed, "What, you are stepping westward?" She gave the poet the idea for his poem, "Stepping Westward."

There is the watchman who passed under Pepy's window crying, "Past one of the clock, and a cold, frosty morning!"

There is the man who first invented the Breton fisherman's petition as he put out to sea, "Oh, God, do Thou help and guard me; the sea is so wide and my boat is so small."

And who was the poor dame who, when questioned by a kindly bishop, held up her dry crust and said, "I have all this, and faith?"

And there are, of course, all the unknowns whose words are sung and said around the world and will not pass away.

NERVES WERE BAD

Could Not Sleep

Tired All Day Long

Miss Florence Coutier, Bark Lake, Ont., writes:—"I was troubled with my nerves, could not sleep at night, and felt tired all day long."

"A neighbor came in to see me, one morning, and advised me to take

"The first box did me good and after the sixth box I was able to go back to my work."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Recipes For This Week

(By Betty Barclay)

MARSHMALLOW SALAD

- 4 oranges.
- 2 bananas.
- 1 cup marshmallows.
- 1 cup cream.
- Yolks of 2 eggs.
- 2 tablespoons sugar.
- 2 tablespoons lemon juice.
- Sprinkling salt.
- 1 cup fresh grated cocoanut.

Cut oranges into sections, slice bananas and cut marshmallows into quarters. Mix with dressing made by scalding cream and thickening it carefully with egg yolks, beaten until light with sugar. Cool dressing and add lemon juice and a light sprinkling of salt before adding fruit. Serve with cocoanut.

CARROT AND PEA DELIGHT

Boil two cups of cubed carrots until tender. Combine with one cup of cooked peas. Make a sauce of three tablespoons flour, three tablespoons butter or fat, one and a half cup milk, two teaspoons sugar, one-half teaspoon salt, and a dash of pepper. Add the cooked carrots and peas, reheat and serve very hot.

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar, so that few children will refuse them. In some cases they cause vomiting through their action in an unsound stomach, but this is only a manifestation of their cleansing power, no indication that they are hurtful. They can be thoroughly depended upon to clear worms from the system.

Women and Peace

Those millions of signatures taken to the naval conference in London, England, by the women of the world signifying their desire that war and vessels of war be abolished constitute a factor so momentous in world events that it cannot be slighted by the delegates who govern its deliberations. It long has been said that women usually get what they want. In this case it is a question of their getting the abolishment of something they do not want.

Use Minard's in the Stable.

WHY SUFFER FROM YOUR LIVER?

Why be handicapped with unsightly blotches on the face, eyes with yellow tinge and that tired and languid feeling? This indicates a torpid liver.

Headache, Dizziness and Biliousness surely follow. You must stimulate your lazy liver, start the bile flowing with Carter's Little Liver Pills.

They also act as a mild laxative, purely vegetable, free from calomel and poisonous drugs, small, easy to swallow, and not habit forming. They are not a purgative that cramps or pains, unpleasant after effect following, on the contrary a good tonic. All Druggists 25c and 75c red pkgs.

SUNDAY SCHOOL LESSON

MARCH 30

HE WENT ABOUT DOING GOOD

Golden Text: "Unto us a child is born, unto us a son is given; and the government shall be upon His shoulder; and His name shall be called Wonderful, Counsellor, Mighty God, Everlasting Father, Prince of Peace."—Isaiah 9.6.

Devotional Reading: John 10.7-16.

A Summary Of Christ's Ministry

Perhaps this, on the whole is the best summary of our Lord's earthly ministry; He went about doing good (Acts 10.28). In the three years of His public ministry He was so busy that He had no time to take His food.

Some great artists have almost fixed in our imagination the type of countenance which we now associate with Jesus; the central face of the Last Supper at Milan, for example, or Rembrandt's Jesus in the hundred guilder print, "Healing the Sick," or Hoffman's Jesus in the Temple, that exquisite face. But we have no authentic face of Jesus, and probably all artists err in giving to Him a countenance too smooth and untroubled. His countenance must have borne the marks of anguish and care. For, as a man of genius said, almost two hundred years ago, "When Christ was only thirty-two, those who saw Him took Him to be a man of fifty." "Thou art not yet fifty" (John 8.57)—so much had life taken out of Him.

No great work is ever done easily. There were places where, we read, He could do no work because of something wanting in the circumstances, something wanting in the hearts of the people, wanting in the heart of the man for whom He was ready to do the great work. We read again that sometimes our Lord would groan in His spirit as though He were wrestling with some obstinate force which was pitting itself against His power. Nothing was done easily that Jesus did. It wore Him out, so that again and again He retired to a mountain apart, there to lay open His soul to the energy of God.

He went about doing good. He looked about to do see where good might be done. We sometimes excuse ourselves because we think we have

done all the good that is clamantly necessary in the little place where we stand.

He went about doing good by His lips, by His hands, by Himself. The biggest thing a man can do for his age or for the world is himself to be a good man and to give himself away for some great thought or dream of faith.—Condensed from an Address by John A. Hutton.

He went about, they said,
In doing good;
He challenged men to follow,
If they would.

He knew no creed, nor system,
But to live
A life of loving service,
And to give.

To give of cheer and faith,
Was his appeal;
To hearten; hope inspire;
The hurt to heal.

Give thou of life and love:
Meet thou the test;
Bid them that love and serve,
To join the quest.

—Hiram B. Harris.

A Gateway To the North

Lakes and Waterways In the Alluring Hinterland That Lead To the Arctic Ocean

Prince Albert National Park in the province of Saskatchewan promises to become the most frequented gateway to the waters of that alluring hinterland of Canada as yet so little known. Beyond park boundaries, to the north, west, and east, lie a succession of lakes and waterways, extending like the links of a silver chain for literally hundreds of miles; on the northwest, finally reaching the waters of the Far North and the Arctic Ocean, and on the east, Hudson Bay.

Persians are taking up the piano, 50 instruments having been imported into the country last year.

When Food Sours

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless dose in water. It is pleasant, efficient, and

harmless. It has remained the standard with physicians in the 50 years since its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another when you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

SOLUTION MAY BE FOUND FOR NAVAL DEADLOCK

London, England.—That a way has been found to break the Franco-Italian deadlock over naval parity, a deadlock which threatened the very life of the five-power naval conference here, was indicated after a surprise meeting between Ramsay MacDonald, prime minister of Great Britain and Aristide Briand, foreign minister of France.

The two talked at French headquarters in the Hotel Carlton. Their conversation lasted two and a half hours, and after it M. Briand said:

"We have been talking about means to bring the conference to a successful conclusion and we are going to apply those means as quickly as possible."

That the conference proved unexpectedly important was shown by the fact that Miss MacDonald had obviously been expecting a quick termination of the conversation, as she waited for her father in the lobby during the entire two hours and a half.

M. Briand was cornered by a handful of newspapermen after the conference. He was as non-committal as usual about details, but was quite definite in saying that the situation had taken a new turn and that optimistic events were in the air.

"Always, when things seem at their worst, one finds a way out," he said. "That is true now."

He added his remark about applying means to make the conference successful.

Mr. MacDonald came from M. Briand's room with a smiling face and greeted his daughter in an unusually cheerful manner, but he declined to answer any questions.

The French leader in evading discussion of details, said: "I am in the habit of chattering too much and then I am reproached for it afterwards. We have been taking our bearings and experts have been making the observations precise." This remark served to bring out the fact that Reno Massigli, French naval technician, and R. L. Craigie of the British technical staff, were present during part of the conversation.

M. Briand further conveyed the idea that his talk with Mr. MacDonald was concerned largely with practical figures instead of political aspects of the problem. Furthermore he said that besides conferring with M. Tardieu, in Paris, he is to see the foreign affairs' committee of the French senate.

To Visit Canada

Train Of Fifty British Riflemen To Complete Here Next August

Ottawa, Ont.—A team of fifty English riflemen are expected to visit Canada this August to compete in the Dominion of Canada Rifle Association matches at Connaught ranges. The team will be composed of competitors at the Bisley meet who can arrange to take the trip to Canada at their own expense. At the last D.R.A. meet, a number of cadets from the English public schools, members of the Officers' Training Corps, competed in the matches. A similar representation from the O.T.C. is expected this year. These announcements were made at the annual meeting of the D.C.R.A. which opened here.

Ten Years At College

Minneapolis.—After spending 10 years at the University of Minnesota and earning three degrees, Thomas Rigor of the Philippine Islands, has left for his home to devote the rest of his life in the improvement of his country. The doctorate degree was conferred on Rigor, March 20. He already has earned degrees of bachelor of arts and master of science.

Want Smarter Uniforms

London, England.—Smarter uniforms for the army were urged by one member of the House of Commons when a questioner brought last year's decline in recruiting to the attention of the House. Another parliamentarian advanced the idea that the whole army should be put into kilts as a means of attracting the favorable eye of youth.

W. N. U. 1830

Airmen Reach Churchill

Vance and Blasdale Marooned In North Since Last October

Churchill, Man.—J. D. Vance, pilot for the Northern Aerial Mine Exploration Limited, and his mechanic Blasdale, who were marooned in the far north many months ago, have reached Churchill. They mushed 500 miles from Baker Lake, aerial station, and were accompanied from Chesterfield Inlet by "Bob" Hicks, of the Northern Aerial Exploration Company. The airmen were guided by two Eskimos, and had a dog train of three teams.

Despite the arduous tramp to the Bay Port, the airmen and their companions were in excellent health. With train service suspended to Churchill for the winter, the men still have a "walk" of more than 100 miles to reach Mile 327 where they can board a train for The Pas.

Participating in the aerial search for Col. C. D. H. MacAlpine, president of the Dominion Explorers, Limited, and his seven companions who were lost in Canada's sub-Arctic regions for nearly two months, Vance and his companion were forced out of the hunt last October. A mishap to their plane after the MacAlpine rescuers headed northward, left them stranded at the isolated aerial post of Baker Lake.

Waiting favorable weather and trail conditions, the men suffered no hardship at the post, where there was a plentiful supply of provisions, and also a Hudson Bay trading post.

After an unsuccessful start in December, the airmen waited another month and on January 2, accompanied by Indian guides with dog teams, got going again, reaching Chesterfield Inlet 13 days later. After resting for a short time, they took to the trail that brought them to Churchill recently. In December the men were on the trail for two weeks, but fierce northern blizzards forced them to return to Baker Lake.

Vance, a veteran airman, is a resident of Toronto, while Blasdale, a youth of 21, is a Winnipeg boy, an experienced pilot and air engineer.

League Society Holds Its Annual Meeting

Membership Of Canadian Branch Has Been Increased

Ottawa.—Representatives of organizations interested in promoting international peace, from all parts of Canada, attended the eighth annual meeting of the League of Nations Society in Canada here. The annual report of the executive showed progress had been made during the past year in extending the activities of the society and increasing the membership.

Dr. H. M. Tory, president of the society, was in the chair and an address on the league was given by Miss Agnes MacPhail. Sir George E. Foster led a discussion of the annual report. He stressed the importance of popular education on the ideals of the league. This was perhaps more difficult in Canada, with its scattered population than in other countries. But it indicated the need of a vigorous organization and a continuance of the work of the society.

Berlin Churches Attacked

Berlin.—Communists were charged recently with attacks on church edifices in Berlin during the night. A Protestant church in north Berlin had a large illuminated Bible text over the door smashed. A Roman Catholic church was daubed with red paint inscriptions deriding religion. It was said here in despatches from Moscow that the anti-religious campaign would be extended to North America.

Had Narrow Escape

Coquimbo, Chile.—An automobile plunged into a 90-foot ravine near the town of Andacollo, turned over at least 12 times and crashed to a stop at the bottom—and none of the seven occupants was killed. Six were seriously injured and the other, a 4-year-old girl, slightly hurt. The motor car was demolished.

Bar Russian Wheat

London, England.—The Italian steamer "Confidenza" with a cargo of Russian grain bound for Rotterdam, was docked at Amsterdam because of a Dutch protest against the import of Russian produce, which members of the Netherlands agricultural board said had been seized from Russian farmers by the Soviet government.

YOUNGEST ADMIRAL

Rear-Admiral Gordon Campbell, V.C., D.S.O., youngest admiral in the British navy and first commander of the mystery ship, who is visiting Canada.

India's Agitators Have Further Grievance

British Medical Council Refuses To Recognize University Degrees

New Delhi, India.—India's agitators have been given another opportunity to foster indignation against Britain by the curt refusal of the British Medical Council to recognize medical degrees of Indian universities.

British medical authorities have long been dissatisfied with the training methods of certain universities in India.

Many efforts have been made to achieve a degree of training which will win the approval of the council and enable Indian doctors to practice in Great Britain. The latest proposal, accepted and sponsored by the Government of India, provided for the appointment of a medical commissioner to ensure uniform training throughout India. The Legislative Assembly, however, rejected the plan and not long after the assembly's action the medical council refused to recognize Indian degrees.

Expect Budget Before Easter

Ottawa.—Corridor gossip in the House of Commons is that the budget will be brought down a few days before the Easter adjournment. The Easter recess is tentatively fixed for the period April 11 to April 22.

Australia Plans Tobacco Culture

Canberra, Aus.—A soil and plant survey is to be made by the Australian government with a view to introducing tobacco culture into the country. It is generally believed that soil and climate will prove favorable.

Winter Lures This Lady

Midwinter in the Metagama region with deep snow and sub-zero weather proved too great an attraction for Lady Kitty Ritson, daughter of the Earl of Airlie, to pass up and she took Canadian Pacific train from Montreal to get there. An outdoor sportswoman all her life, she here realized her desire to be attuned to the great solitudes and the real nature. She fished through holes in the ice and picture shows what kind of sport she had. She mushed for miles through forest and plain behind her dog team and when the day was done she retired to rest in a log cabin made snug with stove against the bitterest blasts. Her ladyship said that she prefers Canada in winter to summer and certainly her adventures seem to prove it.

Passing Of Great Statesman

Tribute Is Paid To the Memory Of Lord Balfour

Woking, Surrey, England.—In a room of his brother's house, looking out to the peaceful English countryside he loved so much, Lord Balfour passed peacefully away.

He was a former prime minister of Great Britain and one of the last of the great Victorian statesmen. His last act was characteristic of his whole life.

Sending for his man-servant, James Colman, who had been in his service 30 years, Lord Balfour took him by the hand and said:

"Good-bye, James. Thank you very much for all you have done for me."

Lord Balfour was 82 years old. He was created an early and Viscount Traprain after the Washington conference in 1921, and will be succeeded by his brother Gerald, in whose house he died.

The funeral was held at Lord Balfour's Scottish home at Whittinghame.

Premier MacDonald, informed almost at once of the Earl's death, declared: "It is the end of a long, useful life, and the whole nation will unite in expressing its regret and in paying its tribute."

The Earl was 81 years old last July, and he played tennis right up to that birthday. A most notable characteristic was an almost unlimited capacity to remember. He frequently astonished friends with recollections of the most trivial incidents in his long career.

Retain Canadian Nurses

Found Impossible To Replace 105 Nurses In Detroit Hospitals

Windsor, Ont.—Possibility that Canadian trained nurses, not citizens of United States, may be retained in service of the city of Detroit, in two hospitals, appeared at a meeting of the Detroit common council. The council was advised by Dr. Carl E. Buck, of the board of health, that it is found impossible to replace 105 nurses who would be discharged under the policy adopted by the council, despite the fact that advertisements had been sent to all parts of United States.

Mrs. Kipling Indisposed

Hamilton, Bermuda.—The wife of Rudyard Kipling was taken to hospital for observation on the arrival of the famous poet and novelist here from the Bahamas. Her condition was not regarded as serious.

Will Re-Open In April

The Pas, Man.—Train service, suspended during the winter months, will be resumed to Churchill about April 8. Passengers will be permitted to travel to the Bay port this year without permits.

CLOSER CHECK WILL BE KEPT ON IMMIGRATION

Ottawa.—The steps taken by the Dominion Government in inviting the provinces to assume a larger share of responsibility in immigration matters was laid before the House of Commons by Hon. Charles Stewart, acting minister of immigration.

He explained that his deputy was taking up the proposal with the individual provinces. The new plans were dependent on the House ratifying the agreements by which the provinces of the west get back the crown lands and other natural resources.

The statement of Mr. Stewart came during a debate on a resolution offered by T. E. Donnelly (Liberal, Willow Bunch), which it carried will place the House on record as opposed to any assisted immigration "except in so far as financial assistance is at present being extended to female domestics."

An amendment of D. F. Kellner, (U.F.A., Athabasca) would have gone further and made any company or other organization bringing in immigrants deposit \$1,000 with the province for each immigrant as a guarantee against becoming a public charge. It proposed also to discontinue assistance to female domestics. The amendment was declared out of order by Mr. Speaker Lemieux.

Replying to an interjection, Mr. Stewart stated that present agreements of the Dominion Government with transportation companies will expire on May 31st. These "transportation company agreements" would not be renewed and the companies had been notified to this effect, he said.

"Under the proposed agreement with the provinces," Mr. Stewart declared, "we are asking them to assume the responsibility for saying how many and what kind of immigrants they are desirous of having and can absorb in any given year. We will not pass into Canada people destined to any province unless it is the desire of that province to receive them."

"It is not the intention of this Government to prevent any individual in the British Isles or in northern Europe who is in a position to finance his passage and who has a reasonable sum of money in his possession to maintain himself when he arrives in this country from entering this country unless the provinces should say that they are not desirous of receiving such immigrants. Under such circumstances we would have to debar to that extent an individual entering into that province."

Mr. Stewart continued: "We are not thinking of continuing any assistance except that we have not yet arrived at a definite decision as to whether we should discontinue assistance to juveniles."

"That is the only case in regard to which we have not yet reached a definite decision."

The Dominion Government he went on, intended to continue to lend its auspices in the way of paying for the necessary number of officials to control immigration. "We must have officers at every port of entry into Canada," Mr. Stewart explained.

The minister could not conceive of any province "shutting the door" to immigration; but believed immigration would continue in accordance with the powers of absorption by the provinces.

Canada's Power System

Ottawa, Ont.—In 1928 Canada had 18 hydro-electric power systems distributed from coast to coast. These systems have an average annual output of 100,000,000 kilowatt hours or more. The Hydro-Electric Power Commission of Ontario had an output exceeding four billion kilowatt hours each. These 18 systems account for 92 per cent. of the total units generated in all central power systems of Canada.

Seize British Steamer

Norfolk, Va.—The British oil screw steamer "Dorothy and Audrey" was taken to Charleston, S.C., in convoy with a coast guard patrol boat, the crew of which had boarded the vessel and discovered 800 cases of liquor in the hold, a report from Charleston indicated.

Value of Canada's Dairy Products Now Closely Approximates the Value of Our Mineral Production

In a comprehensive report for the year 1928, on dairy factories in Canada, just issued by the Canadian Government Bureau of Statistics, some interesting information on the dairy industry is given. The value of all dairy products for the year reviewed is estimated at \$297,625,347, of which creamery butter accounted for \$64,702,538; dairy butter, \$29,103,000; factory cheese, \$30,494,463; home-made cheese, \$82,000; miscellaneous dairy factory products, \$20,581,490, and milk, 636,117,568 gallons, valued at \$152,661,856. The report states that the per capita consumption of butter in Canada is 29.06 pounds, said to be the highest in the world.

The value of Canada's dairy products in 1928 was only about \$10,000,000 less than the total value of the mineral production of the Dominion last year.

The dairying industry in Canada dates from 1608, when Samuel de Champlain, the famous French explorer, whose name is prominently identified with the earlier history of Canada, brought a small number of cattle from France to the colony of Quebec. Cattle were introduced into Acadia, now Nova Scotia, in 1632. The first exports of Canadian dairy products to the United States dates from 1801. The first Canadian cheese factory was established in Ontario in 1864, and the first creamery in Canada for butter making was opened in Quebec in 1873. There are now 2,833 dairy factories in operation in Canada of which 1,216 are creameries, 1,301 cheese factories, 287 combined butter and cheese factories and 29 condenseries. The number of farmers who supply milk and cream to these factories totals over 236,000.

Would Be Interesting Work

Testing Out New Flower Varieties For Garden Plot

Have you a trial garden plot in your garden, a little space reserved for the testing of floral newcomers and novelties? You are missing some of the fun of growing flowers if you haven't. It is said that novelty is the spice of life and the flower world is full of novelties.

Every year brings its new introduction in floriculture. They are featured in the seed catalogues and in the magazine advertisements. Some of these novelties may be worthy of more or less permanent places in your garden; others may not be. The best way to learn which have merit and which have not is to test a few each year. The cost will not be prohibitive and you will be well repaid the expense in the amount of enjoyment you will gain. Go over the lists of new things and select three or four that particularly appeal to you and buy small packages of seeds from reliable firms.

Plant the seeds in a space in your garden specially reserved and prepared for such purposes and follow cultural directions carefully. In other words: Give the novelties a fair trial. Your interest in your trial plot will grow with the plants and you will await, with no little impatience, for the first blooms to appear.

Postal Clerk (trying to get description of the sender from the payee of a money order):

"What's his Christian name?"

"He hasn't got one. He's a Jew."

Judge: "You are very honest to return a wallet found in the street."
Man: "What was the use of it to me? It was empty."—Gutierrez, Madrid.

Not Much For Surplus

Railway-Earned Dollar Has To Be Split Many Ways

A typical railway-earned dollar must be split many ways before the numerous demands upon it are satisfied, a recent analysis of the average "dollar" earned by Frisco lines during 1929 reveals. Forty-three and a fraction cents out of the dollar goes for labor, almost 6 cents for fuel, more than 14 cents for material and supplies, 5.65 cents for taxes and 13.61 for interest, while rentals, personal injuries, loss, damage and depreciation take another 7 cents. After that terrific onslaught on the dollar, 10.98 cents are left for dividends and surplus.

(By Annebelle Worthington)

The jacket dress is one of the most important ideas for Spring.

The model illustrated is one of the best I've seen.

It will serve for sports, spectator sports, or afternoons, according to the fabric selected.

It is charmingly flattering in black silk crepe. The long-waisted bodice of the attractive dress has an inset at front of eggshell shade crepe accented by black bows and piping. The eggshell crepe also lines the jacket and appears in collar and rever facing. The dress may be made with or without sleeves.

For sports and street, it is very conservative in tweed of lightweight in brown and white colouring in rather an indefinite diagonal weave. The inset of dress of harmonizing brown plain woolen is repeated in jacket lining and facing.

For Spring, printed silk crepe in new dark green tones with plain green crepe, independence blue silk crepe with eggshell red and white chiffon and purple wool jersey with orchid faille crepe are stunning selections.

Style No. 3234 is designed in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

R. A. C. HENRY

who has resigned as Deputy Minister of Railways and Canals to become Vice-President and General Manager of the Beauharnois Light, Heat and Power Company. Mr. Henry was formerly Director of Economics of the Canadian National Railways. As Deputy Minister of Railways he had a place on the Board of Directors of the National System and he will remain on the Board, where his intimate knowledge of the affairs of the company will be of the greatest value.

Insect War Resumes

Entomologists Using Means To Combat Ravages Of Insects

A mighty army of mites wages ceaseless warfare on all forms of plant life and just as ceaseless is the warfare waged by skilled entomologists to protect and preserve farm, field and garden crops. Experts of the Dominion Department of Agriculture have already planned intensive campaigns against field crop pests for 1930, including grasshoppers, the wheat stem sawfly, wireworms, the pale western cutworm and his ally the red-backed cutworm, the bertha armyworm, the early cutworm, the Colorado potato beetle, the imported cabbage butterfly, and the root maggot. They also have a watching brief against the forest pests, including the aphids on maple, willow and elm, the spruce spider mite, the forest tent caterpillar and the box elder leaf roller and twig borer.

The Publications Branch of the Department of Agriculture have much interesting information in bulletin form dealing with these and other insect pests.

Real Mummified Wheat

Professor Says Seed Which Sprouts Is Not Genuine

Professor Melchers, botanist of Kansas State Agricultural College, who spent two years in the Nile Valley investigating plant diseases at the invitation of the Egyptian Ministry of Agriculture, has in his possession what he is positive is genuine mummified wheat. It was taken from the pyramids and is believed to be 5,000 years old.

The professor said supposedly mummified wheat which has sprouted is not genuine but is a fake seed which has been colored and made to appear as mummified grain and then sold to tourists.

The ancient wheat in his possession has the shape of the ordinary kernel but is red in color, due to oxidation during the centuries it lay in the pyramid of Sakhara. Under slight pressure the grain turns to red dust.

The Alaskan coast-line is longer than the distance round the earth.

County Health Unit Plan For the Better Protection of The Health of Rural Canada

When To Plant

Best Time To Plant Vegetable Garden Having Regard To Classification Of Seed

The perennial problem of when is the best time to plant garden crops has again come around. An interesting and useful guide in this direction is furnished by the Central Experimental Farm of the Dominion Department of Agriculture.

flower can be set out quite early, but "The safest guide as to the proper time to plant vegetables is first of all to divide the various crops into groups. The first group comprises those that are considered hardy or able to withstand very cool conditions; those that are semi-hardy and must be planted when conditions are more favourable, and lastly those that are very tender, requiring warm, moist soil and ideal seasonal conditions for their proper and normal development."

"Those that fall in the hardy group are onions, smooth and wrinkled peas, spinach, radish and turnip. The average date of early planting of seed of these hardy crops in the division of horticulture, Central Experimental Farm, Ottawa, has been found to be the first week in May."

"In the second or semi-hardy crops we find cabbage, cauliflower, beet, carrot, lettuce, parsnip, and wrinkled peas. The plants of cabbage and cauliflower can be set out quite early, but they must be well hardened off so that they will withstand quite low temperature."

"The third group which includes beans, celery, corn, cucumber, melon, pumpkin, squash and tomato should not be planted until settled warm conditions have arrived. The soil must be warm and moist thus giving quick uniform growth. The best time for planting these crops is from the end of the third week in May until about June 10."

Record Of Performance

Report Of Record Of Performance For Pure-Bred Dairy Cattle For Past Three Years

Dairymen throughout Canada will be particularly interested in the twenty-first report of the Canadian Record Of Performance For Pure-Bred Dairy Cattle, covering the years 1927, 1928 and 1929, issued by the live stock branch of the Dominion Department of Agriculture.

The report contains a detailed record of every animal whose record was such as to merit being placed on the honour roll up to November, 1929. Individual records are listed by class groups and are readily available to the individual through an index to owners.

Complete details as to standards and registration by classes and rules and regulations are included in the report.

Made Him Too Good

JJimmy, the little boy next door to us, was sitting on our front porch looking very lonesome.

"Where's your little playmate Billie?" I enquired.

"Aw, he got a spankin' this morning and he's always so good for a while after that I have to play by myself," was the disgusted reply.

LONELY RESTING PLACE

The remains of the Carl Ben Eielson aeroplane as it was found on the coast of Siberia after weeks of fruitless search under adverse conditions.

Just a few days ago, the Canadian House of Commons did a remarkable thing. Without division it approved a motion requesting the Government to consider subsidizing "County Health Units," in order that the health of rural Canada might be given better protection.

The gigantic scope of such a project at first eludes one, as does the great significance of the fact that by approving the motion without division, the House put the question of national health where it belongs—out of the field of party-politics.

This is extremely fortunate, for it enables every Canadian citizen to discuss, and to give his approval without rancour or considerations of party affiliations to what is probably the greatest piece of health-legislation ever contemplated in the history of the world!

For the County Health Unit scheme, when it is in working order throughout the Dominion, as it is bound to be eventually, and as it already is in parts of Quebec, Saskatchewan and British Columbia, will save more Canadian lives, and more Canadian dollars than the majority of us realize are now being wasted. For there is no doubt that future generations will look back upon our present-day rural health management with horror, as being little short of criminally negligent.

At the beginning of this century, the country was a healthier place to live in than the city. In fact, most of our readers will probably be surprised to learn that it is so no longer. Actually official statistics prove that the farmer has much less chance of long life and health than has his city cousins, and the reason is simply that the city man's health is looked after scientifically, by modern, up-to-date public health departments, while the farmer, and the small-town dweller do not share in this advantage, because it costs a great deal of money, and the country and the small town cannot afford it.

The County Health Unit Plan, providing as it does, for Federal and Provincial payment by subsidy of two-thirds of the cost of each County Health Unit, the municipality served paying the third, recognizes and acts upon the fact that health is a national asset, and that rural lives are as valuable to Canada as urban ones.

Surely this is eminently sound on practical, as well as humanitarian grounds. Everyone, regardless of political affiliations, agrees that Canada, supporting social machinery capable of serving more than double her present population, needs people more than anything else in the world. We seek and are willing to pay for immigrants of the right kind. Yet every year we lose rural-born, native Canadians by the thousands, years ahead of their time, through diseases which could be entirely eliminated, for example, diphtheria and typhoid, both of which are preventable and could be wiped out within a generation, and through tuberculosis, heart disease, complaints peculiar to infants and their mothers, scarlet fever, cancer, despite the fact that proper measures of public health can save and in some centres are annually saving many lives from all of them.

Quebec has attacked this problem. She has 17 rural health units in operation, and expects soon to have eight more. Consider what happened in Beauce County, Quebec, following the organization of such a unit in 1925.

During 1926 there were 643 deaths in the district from general causes. In 1928 this figure dropped 156 to 487. Similarly, infant deaths were reduced from 213 to 160; deaths from tuberculosis from 56 to 51, and deaths from contagious disease, from 86 to 27. Statistics, indicating the reduction of disease generally are not yet available; but a study of the death-rate makes logical the assumption that this too, must have been comparatively important.

Grandmother — "I suppose you think this old farmhouse is rather small dear, after being in the city so long?"

Little Betty—"Small, grandma? Haven't you ever seen a kitchenette?"

24 Hours Ends COLDS

You can send the soothing vapor of the pine woods, to the cause of your cold by inhaling Catarrhazone.

Little drops of healing balsams are distributed through the whole breathing apparatus in two seconds.

Like a miracle, that's how Catarrhazone works in bronchitis, catarrh, colds and irritable throat. You simply breathe its healing, fragrant vapor, and every trace of congestion and disease flees as before fire.

Catarrhazone A Ten-Minute Relief!

No trace of the disease remains after Catarrhazone is used—no more matter to clog the nostrils—no more headache and buzzing ears. Two months' treatment (guaranteed), price \$1.00; smaller size, 50c, at all dealers.

CHAPTER VI.—Continued

"There's nothing to be scared of," declared Grandma, "unless it's Sarah Bennett. Like as not she'll discover something wrong about you. She says the Wickfield girls are all 'provincial.' Jim told me so himself. I looked in the dictionary and it said that provincial means countrified and rude. Well! If Charmian looks countrified I wish you'd tell me so; but she's not rude. Her manners come from the Davises, and they all had a way with 'em even when they were poorer than Job's turkey. Some day I'll tell Sarah Bennett what I think of her."

"I'll do it for you if ever I have the chance," replied the doctor with heart-warming sympathy. "And you needn't worry about your granddaughter. I assure you there's nothing provincial in her make-up."

TAKE NO CHANCES WITH BABY!

Cook Her Food in the "Health Ware"

Doctors recommend Enameled Ware for cooking baby's food. It is so simple to clean . . . so easy to keep sanitary and free from germs. It cannot stain. There is no metal surface exposed to the food. Nothing to absorb moisture, flavors nor odors.

Make sure you get McClary Enameled Ware . . . the Modern "Health Ware". Watch for the familiar McClary label.

McClary ENAMELED WARE

W. N. U. 1830

"Well, you ought to know," responded Grandma, "coming from a big place like Boston. I guess my girl's all right even—"

Charmian had been an amused spectator of this scene, but now she interrupted with a laugh.

"Come, Grandma, you've talked me over thoroughly enough; and we must start along if I'm to be any use to Mrs. Merry. Your supper's all laid out on the kitchen table; and don't you dare to wash a single dish. Just leave them in the sink. I shan't be late; and if you need anything you can call up Doctor Howe, and he'll let me know."

"I shan't need anything," replied the old lady promptly. "You run along and have a real good time. And don't you be too snippy to Jim Bennett, either. He's a good boy, and not entirely responsible for his own actions."

"Oh, I'll be good to him!" promised Charmian, laughing; and Grandma leaned forward in her chair to watch the two young people start off in the direction of the old white church that faced the village green.

"Provincial!" she snorted angrily. It was plain to see that Sarah Bennett's comment was not to be treated lightly. "I don't believe it. I guess I know a country bumpkin when I see one, even if I haven't been out of Wickfield for five years. Charmian's a sight more stylish, and stands up straighter than those fashion plates in the mail order catalogues from Chicago; and she never did a rude thing in her life. She's Luther Davis all over when it comes to manners. Why, she even thanks Tommy Goomy when he takes away the garbage, though goodness knows it's not a favor. He and that Eldridge boy had an awful fight one Saturday to see which would get it."

Grandma was so stirred up that an automobile passed without her seeing it as she went on indignantly: "And talk of hats! Why, Charmian could trim one herself that would make that green mail-order hat that Sarah Bennett's making such a fuss about, look like the tail feathers to a rooster! There goes Sarah now. She's got on her brown taffeta, and if she helps in the kitchen like she usually does, it's liable to get spotted. I declare, I almost hope she spoils it!"

Suddenly Grandma laughed at herself, and relaxed a little. "I'm afraid I'm getting real spiteful in my old age," she murmured. "I ought to be ashamed; but for Sarah Bennett to put on airs to a Davis, is a drop more'n I can swallow. There goes Emmy Bascomb and the twins. I wish Emmy'd stop and let me see her new shirtwaist but I suppose she's in a hurry. She's waving, and so are the children. They look terribly cute in their new dresses, one pink—one blue, same as usual."

"Dear me! I don't see how anybody stands living on a side street where there's not much passing. I wish I'd had Charmian put my supper on a tray in here. I don't want to miss anything while I'm eating. If only somebody'd stop in on an errand I'd get 'em to fix it for me. There goes Gam Garfield, but he's reading his paper and won't look up. Here comes an auto. I do believe it's Jimmy Bennett, and—"

Grandma rapped sharply on the window, and Jim, who was looking at the house almost against his will, saw her summons and stopped his car. She beckoned, and he came in asking:

"You want something, Grandma? I saw you wave."

"And it's lucky for me you did," smiled the old lady. "I want you should bring my supper in from the kitchen. Charmian left it all set out on the table, but I don't want to miss the passing just as every one's going to the church. You take that big tin tray in the buttery, and put everything on it. The tea's in the teapot, and all you've got to do is to pour in some hot water from the kettle. I don't mind eating a little early, and maybe no one else would be coming by that I could ask."

"You want it on the card table, Grandma?" asked Jim affably. "I'll move it over before I get the feast."

"That's right, sonny. It's plain to see you're handy about the house. There goes Lizzie Baker, hurrying as usual. For a wonder she hasn't got on her apron, but she's carrying it in her hand. It's real fun eating here by the window, Jimmy. Sort of like having a front seat at the opera."

Jim steadied the little table, and peered for a moment into the quiet street.

"Well, you ought to know," responded Grandma, "coming from a big place like Boston. I guess my girl's all right even—"

Charmian had been an amused spectator of this scene, but now she interrupted with a laugh.

"Come, Grandma, you've talked me over thoroughly enough; and we must start along if I'm to be any use to Mrs. Merry. Your supper's all laid out on the kitchen table; and don't you dare to wash a single dish. Just leave them in the sink. I shan't be late; and if you need anything you can call up Doctor Howe, and he'll let me know."

"I shan't need anything," replied the old lady promptly. "You run along and have a real good time. And don't you be too snippy to Jim Bennett, either. He's a good boy, and not entirely responsible for his own actions."

"Oh, I'll be good to him!" promised Charmian, laughing; and Grandma leaned forward in her chair to watch the two young people start off in the direction of the old white church that faced the village green.

"Provincial!" she snorted angrily. It was plain to see that Sarah Bennett's comment was not to be treated lightly. "I don't believe it. I guess I know a country bumpkin when I see one, even if I haven't been out of Wickfield for five years. Charmian's a sight more stylish, and stands up straighter than those fashion plates in the mail order catalogues from Chicago; and she never did a rude thing in her life. She's Luther Davis all over when it comes to manners. Why, she even thanks Tommy Goomy when he takes away the garbage, though goodness knows it's not a favor. He and that Eldridge boy had an awful fight one Saturday to see which would get it."

Grandma was so stirred up that an automobile passed without her seeing it as she went on indignantly: "And talk of hats! Why, Charmian could trim one herself that would make that green mail-order hat that Sarah Bennett's making such a fuss about, look like the tail feathers to a rooster! There goes Sarah now. She's got on her brown taffeta, and if she helps in the kitchen like she usually does, it's liable to get spotted. I declare, I almost hope she spoils it!"

Aids
digestion, too!

"Can't say that I see any—well, similarity," he remarked. "I guess Charmian gets some of her ideas from you, Grandma. She's forever seeing things that I can't see at all. Is that table in the right place? Now I'll go after the grub."

"Be sure you don't forget the tea," called the old lady as he moved away.

Jim turned, his face suddenly gloomy.

"Forgetting's not one of my habits, Grandma Davis," he said soberly. "There are times when I wish to thunder it was."

He was gone before Grandma could reply, but she closed her eyes a moment in an effort to get his meaning. When she opened them the Merrys' Spitz dog, Gypsy, was trotting along the sidewalk opposite carrying a huge ham bone, and in watching him hunt a place to bury it, Grandma forgot her helper till he appeared, bearing a well-loaded tray.

"He's buried it under Lizzie Baker's lilac bush!" she exclaimed excitedly. "I declare, he's smart as a human being. Probably he's saving it for a rainy day. He's gone off toward the church again, thinking to get some more scraps most likely."

"Scraps?" echoed Jim, puzzled, as he laid down his burden. "Who are you talking about? What's been buried under Miss Lizzie's lilac? You sound like an adventure story, Grandma—pirates, you know, burying pieces of eight."

Grandma chuckled.

"It was a treasure all right, to him, Jimmy. I'm talking about the Merrys' Gypsy. There's not a cuter dog in town, and if you ask me, I'll say he knows a sight more than some o' the Wickfield voters do. What's all this stuff for, sonny? I don't need two forks or—"

"Maybe not," replied Jim, a twinkle appearing in his brown eyes, "but I'm a conscientious objector on the subject of eating with my fingers—that is, when it can be avoided. There's plenty here for two, and—"

"You going to stay?" broke in Grandma, beaming.

"I thought if I hinted plain enough that perhaps you'd do the rest," grinned Jim; and with a flourish he set a small, round shortcake in the centre of the table.

CHAPTER VII.

"Well," exclaimed Grandma, as her self-invited guest drew up a chair and proceeded to pour the tea, "that is real cozy! It's not often that I have company when Charmian's away. She'll be surprised enough when I tell her I had the handsomest young man in town to supper with me. Give me a drop more cream, Jimmy. This tea's so hot I can't drink it. Maybe you'd have had a better supper at the church; but you can console yourself remembering that it's a kind deed to keep an old woman company."

"I didn't hint for that invitation in order to do any kind deed," replied Jim amiably, "but because I wanted to stay. You don't seem old to me, Grandma. Some ways you seem younger than Charmian."

To his surprise Grandma's face sobered.

"Sometimes I think I feel younger," she admitted. "Charmian's got too much responsibility on her shoulders—has had, ever since she was born. One thing, she works too hard; and there are times when she gets discouraged though she doesn't say so. The Davises never were folks to whine about things. They take life as

it comes and make the best of it. I've sometimes thought that if Charmian only had the chance she'd be a poet, like her grandfather. When she was a little girl she wrote some real pretty verses about the first violet. But she's never had time to give to it as her grandpa had."

As he looked up at an ugly crack in the ceiling, it struck this practical young man that if Grandpa Davis had given more time to the farm and less to poetry, his granddaughter wouldn't have to worry about finances. Not wishing to voice this thought he took a mouthful of bread and butter that made speech impossible; while Grandma, turning toward the window, said:

"There goes those summer folks from over South Wickfield way! Do you suppose they're going to the church? Last time they came the woman gave two dollars for a loaf of Emmy's spice cake, though all they were asking for it was one-fifty. She wouldn't take the change; and she bought all Charmian's fudge and your mother's ginger cookies. It's a wonder her folks weren't sick with all that sweet stuff in the house at once. Is it true that they're going to set off fireworks on the common after supper? Mrs. Merry told us they were thinking of it. I'd admire to see 'em. I've never seen all the fireworks I'd like to see."

(To Be Continued).

To Asthma Sufferers. Dr. J. D. Kellogg's Asthma Remedy comes like a helping hand to a sinking swimmer. It gives new life and hope—something he has come to believe impossible. Its benefit is too evident to be questioned—it is its own best argument—its own best advertisement. If you suffer from asthma get this time-tried remedy and find help like thousands of others.

Battalions Perpetuated

Little Helps For This Week

"By works a man is justified, and not by faith only."—James ii. 24.

No answer comes to those that pray
And idly stand,
And wait for stones to roll away
At God's command;
He will not break the binding cords
Upon us laid,
If we depend on pleading words,
And will not aid.

The great human duties are prayer and work,—prayer for every needed blessing, and work to realize it,—prayer, as though God must do the whole, and work, as though we must do it ourselves. These are the two poles of the great galvanic battery.
—Roswell Dwight Hitchcock.

A Fool-Proof Blimp

Manufacture of a "fool proof" family blimp, costing \$1,000, is under way by Anton Heinen, war-time commander of German Zeppelins. The craft will be 95 feet long, with speed 75 miles an hour, and inflated with non-inflammable gas.

Needless Pain!

Some folks take pain for granted.

They let a cold "run its course."

They wait for their headaches to "wear off."

If suffering from neuralgia or from neuritis, they rely on feeling better in the morning.

Meantime, they suffer unnecessary pain. Unnecessary, because there is an antidote. Aspirin tablets always offer immediate relief from various aches and pains we once had to endure. If pain persists, consult your doctor as to its cause.

Save yourself a lot of pain and discomfort through the many proven uses of Aspirin. Aspirin is safe. Always the same. All drug-stores with complete directions.

"Beggars of Life"

To whom could she go? Outcast, homeless, Hunted, Wanting to hide. To whom could she turn but to the "Beggars of Life," wandering waifs of fate? Among the comfortless she sought comfort. Among the selfish she sought succor. America's literary genius, Jim Tully, factory boy, hobo, down-and-out, student, philosopher, brilliant author, tells the story as he saw it.

DON'T MISS IT

Snicklefritz ----

Skirts had to be longer to be skirts any longer.

People who live in glass houses shouldn't throw parties.

Like the skirts, the days are lengthening very, very slowly.

If your luck isn't what it should be, write a "p" in front of it and try again.

"I saw a young man trying to kiss your daughter," said the mischief-maker.

"And did he?" asked the mother.

"No."

"Then it wasn't my daughter."

Two days after the colored man swapped his wife for a quart of gin, one of his neighbors found him sitting morosely beside the road.

"How you all gettin' on, Abner, since de ol' woman's gone?"

"Jes' so-so. I wish I had the ol' lady back."

"You lonely?"

"Lordy, no. I'se thirsty."

"Madge has postponed answering Jack until she can look up his ratings."

"The asset test, so to speak."

Jack—You should have seen the fright I got on my wedding day.

Bill—Hush! That's no way to talk about your wife.

Mother: "Come, Freddie, and kiss your Aunt Martha."

Freddie: "Why, ma, I ain't done nothin'!"

The Sad Old Story

At last I realized that our strained relations could not continue any longer. I had to admit that the end was near and that a break was inevitable. For months I had labored under a delusion and refused to believe that my wife could consider such perfidy. Poor, silly, blind fool that I had been! I now knew the meaning of all those subtle hints and sly allusions which had been cast at me lately. While I had been living in a fool's paradise she had been secretly preparing for a separation. I wouldn't quarrel with her. If she was determined to leave me after all our years of married life I would let her go quietly and avoid trouble. So I said to her: "All right, if your mind is made up to this rash action—go ahead and get your things!"
